## ERIKA Enterprise for dsPIC 1.4.3 released

Posted by paolo.gai - 2008/07/18 19:29

---

Dear all,

after a long, long work, I'm pleased to announce that we released ERIKA Enterprise for dsPIC version 1.4.3!!!

Here some of the improvements:

- New license: GPL with Linking Exception instead of the double licensing (useful for implementing industrial applications with ERIKA)
- OSEK Conformance classes distributed by default (BCC1, BCC2, ECC1, ECC2) (there is no more a distinction between ERIKA Enterprise and ERIKA Enterprise Basic)
- Eclipse 3.4
- USB support for FLEX Full
- EDF deadlines also in RAM
- OpenZB Zigbee stack
- Scicos Pack V6 with support for USB and Zigbee transmission, as well as Hardware in the Loop!!!

You can find everything in the download page of the Evidence website...

Ciao!

Paolo
